

Arkivum - Library professional presentation

2018/06/25

2018/06/08

In cooperation with other libraries, the Hungarian national library is currently working on the renewal of its entire IT infrastructure and library system. NSZL makes an effort to get acquainted with the latest international trends and the already existing best practices. On June 25, 2018, Arkivum will present its software designed to serve long-term stock preservation.

In cooperation with other libraries, the Hungarian national library is currently working on the renewal of its entire IT infrastructure and library system. NSZL makes an effort to get acquainted with the latest international trends and the already existing best practices.

As part of the renewal process, we have held [several presentations](#) [1] in National Széchényi Library. These presentations have been recorded and published in [Videotorium](#) [2] - on topics such as integrated library systems, digitization and web archiving.

The next occasion will be on Monday June 25, 2018, from 1 p.m. until 5 p.m., when software and service provider [Arkivum](#) [3] will hold a software presentation in the Ceremonial Hall of NSZL.

To whom do we recommend the event?

This event is for library and archives leaders across Europe who are interested in furthering their organizations' understanding of how to address the need for secure, accessible data archives. The session will present decision-makers the model to enhance their service to users, guarantee regulatory compliance, safeguard their precious digital collections and ensure their protection for future generations.

This workshop is focused on Arkivum, a market leading digital preservation and data archiving partner working in direct collaboration with EBSCO.

Arkivum Perpetua is a leading end-to-end digital preservation and archiving solution designed to address the unique requirements and challenges of the heritage, libraries and higher education markets. With its flexible structure, organizations select the functionality they need right then, and later add other modules as their requirements evolve. Based on OAIS (Open Archival Information Standard), Perpetua meets regulatory compliance needs for secure archiving and retrieval over the long term, and ensures organizations benefit from open standards based technology with the reliability of a managed services infrastructure.

Speakers:

Arkivum attendees:

- **Paula Keogh**, Sales Manager in Europe for Heritage, Libraries and High Education
- **Sinead McKeown**, VP Global Product Management
- **Matthew Addis**, CTO (remotely for the technology spotlight session)
